EDITORIAL ACTIVITY

Journals:

COST TINNET (2014-2018)

Current:

Review Editor for Neuro-Otology and for Auditory Cognitive Neuroscience.

Topic Editor for Brain Sciences

Member of the Scientific Committee of the journal “Argomenti di Otolaringoiatria Moderna”

Reviewer for: Frontiers in Cellular Neuroscience, Frontiers in Immunology, Frontiers in Neuroanatomy, BMC Neuroscience, Journal of Physiology, Trends in Hearing, JoVE.

2019-20

Editor for the Frontiers Special Topic: “Neuroimmunology of the inner ear”

2021

Editor for the Brain Sciences Special Topic: “Biomarkers in neurotology”

Textbooks:

Co-author in the following textbooks:

2010 - Fisiologia: molecole, cellule e sistemi (D'Angelo, Peres), EdiErmes

2013- Cellule, tessuti, sistemi (Zaccheo, Pestarino), Pearson

TEACHING ACTIVITY

University of Pavia

2020/21-current

General Pathology and Pathophysiology (5CFU, CTF)

2008/09-current

Anatomy and Cell Physiology (9 CFU, L.M. Pharmacy)
2010/11-current
Sensory Physiology and Analysis (3CFU, L.M. Pharmacy/CTF)
2008/09-2015/16
Physiology of Sensory Receptors (3CFU, Neurobiology)
2003/04-2007/08
Ion Channel Biophysics (2CFU, Pharmacy/CTF)
2014/15-16/17
Human Physiology (Nursing School)

2015-current
Lecturer for the topic “Mechanisms of tinnitus onset” in several Continuing Medical Education courses

SCIENTIFIC INTERESTS

Speaker at several open meetings for tinnitus patients sponsored by AIT/AU-TU
Host and speaker at Tinnitus Week initiatives for Italy

SCIENTIFIC EXPERTISE

Histology

Anatomy and histology of the nervous system and inner ear;
Immunofluorescence;
Cryoslicing;
iDISCO;
Temporal bone imaging;
Stereology;
Image analysis (FIJI, ITK-SNAP, MATLAB);
Lightsheet microscopy;
Confocal microscopy

Computational neuroscience:

Neuronal modeling with NEURON;
Dynamic analysis of complex systems;
MATLAB;
Python

Electrophysiology:

Whole-cell patch clamp (ruptured and perforated);
 Capacitance measurements;
 Oocyte recording;
 Stimulation and recording from peripheral vestibular organs;
 Brain and sensory organ slices;
 Rodent ABR

Other

Ca²⁺-imaging;
 RT-PCR
 Hearing and Tinnitus behavioural testing

My scientific interest has been focused on signal transmission in sensory systems, and in particular signal encoding and synaptic transmission in the auditory and vestibular system.

For the first part of my career, I mainly studied signal processing by vestibular hair cells, especially as regards the influence of ion channels and Ca²⁺ on response dynamics. Subsequently, my main research topic shifted to the central vestibular and auditory system, and in particular neuroimmune interactions affecting it in health and pathology. Currently I am on a pretty

interesting detour following the ins and outs of brain macrophages in the choroid plexus, and where they move upon neuroinflammation. The main question I would like to solve is what are the signals that say that a neural activity pattern is “wrong” in the auditory system and trigger plastic changes (helpful or maladaptive) in the neuronal circuits. Answering this question will help treating disorders such as tinnitus, where maladaptive plasticity appears to be key.

GRANTS**COLLABORATIONS**

2008-current
Donations from AIT Onlus (PI: Prof. Paola Perin, 5000-15000 EUR-yr)
2018
Internal Research funding from the Dept. of Molecular Medicine (PI: Prof. Roberto Pizzala, 16000 EUR)
2017
Universitiamo crowdfunding campaign (PI: Prof. Paola Perin, 17000 EUR)
2011
Miroglia grant for the project "Study of afferent transmission in vestibular organs" (PI: Prof. Paola Perin, 10000 EUR)
2005-2008
MURST Cofinancing extension: "Processes determining the sensory discharge dynamics in

semicircular canals". PI Prof. Paola Perin
2002-2007
NIH R01 Grant: "Cellular mechanisms of the vestibular system":
PI: Prof. J. Goldberg
2002-2004
MURST Project: "Presynaptic modulation of transmitter release at the hair cell afferent synapse". PI: Prof. P. Valli
